

**Amendments to the Claims:**

Claims 1 and 2 are amended and claim 9 is added. Claims 1 through 9 are currently pending in the application. No claims beyond those for which a fee has been paid are presented for examination.

Please amend the claims as follows.

1.(Currently Amended)      A package decoration with pop-up display comprising:

a foldable panel sized to overlie a portion of a side of a package, the foldable panel having a fold line along which the foldable panel folds and which defines a first section and a second section of the foldable panel that overlie each other when the foldable panel is folded along the fold line, and

a pop-up display affixed to the foldable panel and formed of one or more sheets that are configured to fold into a generally flat and compact configuration that is at least partially enclosed between portions of the first and second sections of the foldable panel when the foldable panel is folded along the fold line, the pop-up display is affixed to each of the first and second sections of the foldable panel and to expands from the flat and compact configuration between the first and second sections of the foldable panels when the first and second sections overlie each other to form a three dimensional display when the foldable panel is opened along the fold line to position the first and second sections extending from each other along the fold line.

2.(Currently amended)      The package decoration of claim 1 further comprising a ~~ribbon~~ overlying band that holds the panel to the package and extends from the panel to extending around at least a portion of the package.

3.(Original) The package decoration of claim 1 wherein the panel includes a greeting card section displaying a greeting.

4.(Original) The package decoration of claim 1 wherein the popup display forms a dimensional display by joined panels.

5.(Original) The package decoration of claim 2 wherein the popup display forms a dimensional display by joined panels.

6.(Original) The package decoration of claim 1 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object.

7.(Original) The package decoration of claim 2 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object.

8.(Original) The package decoration of claim 1 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object and by one or more joined panels.

9.(New) The package decoration of claim 2 wherein the band is a ribbon.
